

AMENDMENTS TO THE CLAIMS

Listing of Claims

WHAT IS CLAIMED IS:

1-21. Cancelled.

22. (Currently Amended) A method in a data processing system for selectively transmitting an email attachment of an email, the method comprising:

selecting, by a sender, email attachment recipients, selectable notification recipients, and excluded recipients for the email to be sent, wherein the excluded recipients do not receive the email attachment;

receiving, from the sender, an instruction to add a selectable notification for the email attachment to the email to be sent to the selectable notification recipients, wherein the selectable notification permits op.;

transmitting the email to the email attachment recipients, the email with the selectable notification to the selectable notification recipients, and the email to the excluded recipients; and

whereby, activation of the selectable notification associated with the email permits transmission of the email attachment.

~~receiving the email attachment by both the selectable notification recipients, who activated the selectable notification, and the email attachment recipients;~~

23. (Currently Amended) The method of claim 22, further comprising prompting the sender, in response to activating the selectable notification, to optionally add comments [[before]]prior to sending the email attachment to the selectable notification recipients~~[[receive the email attachment]]~~.

24. (Currently Amended) The method of claim 22, further comprising prompting ~~in response to activating the selectable notification,~~ the sender to locate the email attachment for the selectable

notification recipients [[before]]prior to the transmitting the email with the selectable notification to the selectable notification recipients~~[[receive the email attachment]]~~.

25. (Currently Amended) The method of claim 22, further comprising ~~[[receiving, by the excluded recipients,]]~~transmitting an indication in the email that the email had the email attachment despite the email attachment being unavailable to the excluded recipients.

26. (Currently Amended) The method of claim 22, wherein the receiving an instruction to add a selectable notification comprises inserting code in the form of a markup language for allowing the selectable notification recipients to receive the email attachment.

27. (Currently Amended) The method of claim 22, wherein the receiving an instruction to add a selectable notification comprises inserting, into the email, an icon linked to code for allowing the selectable notification recipients to receive the email attachment.

28. (Currently Amended) The method of claim 22, wherein the receiving an instruction to add a selectable notification comprises inserting, into the email, an icon linked to code for allowing the selectable notification recipients to receive the email attachment based on one or more preferences.

29. (Currently Amended) The method of claim 22, wherein the selecting the email attachment recipients comprises selecting ~~[[persons]]~~recipients the sender chooses to receive the email attachment with the email and without the selectable notification.

30. (Currently Amended) A device in a data processing system for selective transmission of an e-mail attachment for an email, the device comprising:

an email client for composing the email to be sent to email attachment recipients, selectable notification recipients, and excluded recipients, wherein the excluded recipients do not receive the email attachment;

a notification incorporator, in communication with the email client, to add a selectable notification for the email attachment to the email to be sent to the selectable notification recipients;

a code associator, in communication with the notification incorporator, to associate code with the selectable notification for fetching the[[n]] email attachment [[in]]for the email to be sent to the selectable notification recipients; and

whereby, activation of the selectable notification associated with the email permits transmission of the email attachment.

~~another email client for receiving the email attachment by both the selectable notification recipients, who activated the selectable notification, and the email attachment recipients.~~

31. (Previously Presented) The device of claim 30, wherein the notification incorporator prompts a sender at the email client to select the email attachment recipients, the selectable notification recipients, and the excluded recipients.

32. (Previously Presented) The device of claim 30, wherein the notification incorporator comprises an icon selector for the selectable notification.

33. (Previously Presented) The device of claim 30, wherein the notification incorporator comprises preferences associated with the email attachment.

34. (Previously Presented) The device of claim 30, wherein the code associator comprises code comprising a markup language.

35. (Previously Presented) The device of claim 30, wherein the code associator comprises a code generator to generate code, upon activation of the selectable notification, in accordance with one or more preferences associated with the email attachment.

36. (Currently Amended) The device of claim 30, further comprising an attachment responder for prompting a sender ~~[[before]]~~prior to transmission of the email attachment to the selectable notification recipients, who activated the selectable notification.

37. (Currently Amended) A machine-accessible storage medium containing instructions, which when executed by a machine, cause the machine to perform operations for selective transmission of an e-mail attachment for an email, comprising:

selecting, by a sender, email attachment recipients, selectable notification recipients, and excluded recipients for the email to be sent, wherein the excluded recipients do not receive the email attachment;

receiving, from the sender, an instruction to add a selectable notification for the email attachment to the email to be sent to the selectable notification recipients;

transmitting the email to the email attachment recipients, the email with the selectable notification to the selectable notification recipients, and the email to the excluded recipients; and

whereby, activation of the selectable notification associated with the email transmits the email attachment.

38. (Currently Amended) The machine-accessible storage medium of claim 37, wherein the operations further comprise instructions for prompting ~~the sender in response to activating the selectable notification~~, to optionally add comments and to locate the email attachment [[before]]prior to sending the email attachment to the selectable notification recipients~~[[receive the email attachment]]~~.

39. (Currently Amended) The machine-accessible storage medium of claim 37, wherein the instructions for receiving an instruction to add a selectable notification comprise inserting, into the email, code in the form of a markup language for allowing the selectable notification recipients to receive the email attachment.

40. (Currently Amended) The machine-accessible storage medium of claim 37, wherein the instructions for receiving an instruction to add a selectable notification comprise inserting, into the email, an icon linked to code for allowing the selectable notification recipients to receive the email attachment optionally based on preferences.
